EDUCATION

MASAI SCHOOL, BENGALURU (2023 – 2024)

Full Stack Web Development (Full time)

DGET UNIVERSITY (2017 – 2019)

Diploma (Electrician)

WORK EXPERIENCE

Algorisys Technologies – Full Stack Developer (Nov 2024 – Jun 2025)

- During my tenure at Algorisys Technologies, I worked on an Employee Management application, where I was responsible for developing both frontend (client-side) and backend (server-side) components, with a focus on building a responsive and user-friendly interface.
- Managed live production deployments, including server maintenance, handling production data, and resolving real-time issues to ensure smooth operation.

PROJECTS

1) SwiftPay (Finance App) | Oct 2023 (6 days)

- Engineered a secure payment app with React, Redux, and Styled-components.
- Developed authentication flow with Login, Signup, and Logout.
- Created transaction management workflow for users to send and receive money.
- Enhanced transaction management with sorting, filtering, and search capabilities.
- Integrated dual-format charts (bar and line) for clearer analysis of income and expenses.

2) TechWave (Educational App) | Dec 2023 (6 days)

- Designed a comprehensive full-stack educational platform using React, Redux, and MongoDB.
- Implemented user Registration, Login, and Logout functionality.
- Created an admin dashboard enabling course creation, updates, and deletion.
- Built advanced filtering and search features to optimize the admin and user experience.

3) GatherPro (Event Management App) | (Jun 2024 – Aug 2024)

- Built an admin-only event management system with full event lifecycle management, including client participation, registration, and tracking.
- Integrated Google Calendar to send automated email invitations and meeting confirmations to users, including registration and post-event thank-you emails.
- Developed a Contact Form for user queries and advanced search/filtering for admin tracking.
- Implemented Google OAuth authentication to enable secure admin access for event creation.
